

**Viewpoint 3**  
Dueodde

The viewpoint is at Dueodde beach at Bornholm's southern tip. In addition to an open view to the sea, Due Odde is a large holiday area with sandy beaches.

The nearest new wind turbine is approximately 15,5 km from the viewpoint.

**Viewpoint 3**  
Dueodde

The viewpoint at Dueodde is recorded as a photographic panorama of four separate photographs stitched together to a continuous view of the OWF.

The image above shows a scaled-down version of the stitched panorama. The photographs used for the visualizations are shown on the following four pages.

The image above shows in white outline the maximum extent of the planning area in Plan for Programme Energy Island Bornholm for Bornholm I Syd and Nord, and Bornholm II, as seen from Dueodde.

The following 16 pages compare the existing conditions with scenarios A, B, C and D.

All photos and visualisations are reproduced in the same magnification for the visualisations to be comparable. The images used were recorded with a 50 mm focal length. If the report is printed on A3, the ideal viewing distance is around 60 cm for all the visualisations shown.
