In the directions for use of the additive and premixtures, the storage conditions shall be indicated. 2. Minimum content of the additive when it is not used in combination with other micro-organisms as silage additives: 5×10^7 CFU/kg fresh material. 3. The additive shall be used in easy and moderately difficult to ensile fresh material². 4. For users of the additive and premixtures, feed business operators shall establish operational procedures and organisational measures to address potential risks resulting from their use. Where those risks cannot be eliminated by 	<i>[10 years from the date of entry into force of this Regulation. To be completed by the OP]</i>
