Minimum content of the additive when it is not used in combination with other micro-organisms as silage additives: 1×10^8 CFU/kg fresh material. For users of the additive and premixtures, feed business operators shall establish operational procedures and organisational measures to address potential risks resulting from their use. Where those risks cannot be eliminated by such procedures and measures, the additive and premixtures shall be used with personal skin and breathing protective equipment. 	<i>[10 years from the date of entry into force of this Regulation. To be completed by the OP]</i>
