

ENANNEX

Identification number of the feed additive	Name of the holder of authorisation	Name of the additive	Composition, chemical formula, description, analytical method	Species or category of animal	Maximum age	Minimum content	Maximum content	Other provisions	End of period of authorisation
						CFU/kg of complete feed with a moisture content of 12%			
Category: zootechnical additives. Functional group: gut flora stabilisers.									
4b1841	Lactosan GmbH&Co.KG	<i>Enterococcus lactis</i> DSM 7134	<p>Additive composition Preparation of <i>Enterococcus lactis</i> DSM 7134 containing a minimum of: powder: 1×10^{10} CFU/g of additive granulated (microencapsulated): 1×10^{10} CFU/g of additive</p> <p>Characterisation of the active substance Viable cells of <i>Enterococcus lactis</i> DSM 7134.</p> <p>Analytical method (1) Enumeration: spread plate (or pour plate) method on bile esculin azide agar or on Slanetz and Bartley agar (EN 15788) Identification: Pulsed-Field Gel Electrophoresis (PFGE) CEN/TS 17697 or DNA sequencing methods</p>	Sows	-	5×10^8		1. In the directions for use of the additive and premixtures, the storage conditions and stability to heat treatment shall be indicated. 2. For users of the additive and premixtures, feed business operators shall establish operational procedures and organisational measures to address potential risks resulting from their use. Where those risks cannot be eliminated by such procedures and measures, the additive and premixtures shall be used with personal eye, breathing and skin protective equipment.	[10 years from the date of entry into force of this Regulation. To be completed by the Service responsible for the publication]

(1) Details of the analytical methods are available at the following address of the Reference Laboratory: https://joint-research-centre.ec.europa.eu/eurl-fa-eurl-feed-additives/eurl-fa-authorisation/eurl-fa-evaluation-reports_en.
