

Søgeprotokol for Nationale Kliniske Retningslinjer

Projekttitel/aspekt	NKR 46 for Behandling af Anorexia Nervosa (guidelines)
Fagkonsulenter / projektleder	Tine Pedersen og Mette Bentz / Marie Jakobsen
Søgespecialist	Karen Tølbøl Sigaard
Senest opdateret	16.10.2015

Baggrund	<p>Der findes ikke opdaterede landsdækkende retningslinjer for behandling af anoreksi på tværs af børne- og voksenområdet i Danmark. Sundhedsstyrelsen offentliggjorde i 2005 et referenceprogram for spiseforstyrrelser, som også omfattede anbefalinger vedr. behandlingen af anoreksi⁹. Børne- og Ungdomspsykiatrisk Selskab har i 2011 udarbejdet en landsdækkende klinisk retningslinje vedr. udredning og behandling af børn og unge (7-17 år) med anoreksi¹⁰. Sundhedsstyrelsen har på denne baggrund besluttet at udarbejde en national klinisk retningslinje for behandling af anoreksi med henblik på at sikre en optimal og ensartet behandling på tværs af regioner.</p> <p>Den nationale kliniske retningslinje vil ikke være en sammenhængende beskrivelse af alle relevante dele i patientforløbet, men vil fokusere på 8-10 nedslagspunkter. Den nationale kliniske retningslinje er foreløbigt afgrænset til behandling af anoreksi blandt børn, unge og voksne. Retningslinjen vil alene vedrøre sundhedsfaglige ydelser. Retningslinjen vil ikke omhandle udredning eller afklare spørgsmål vedr. visitation og organisering af indsatsen.</p>
Søgetermer	<p>Engelske: anorexia, anorexic, eating disorder(s), disordered eating</p> <p>Danske: anoreksi, anorektisk, spiseforstyrrelse(r), spisevægning</p> <p>Norske: anoreksi, anorektisk, spiseforstyrrelse(r)</p> <p>Svenske: anorexi, anorektisk, ätstörning(ar)</p>
Inklusions- og eksklusionskriterier	<p>Sprog: Engelsk, dansk, norsk og svensk</p> <p>År: Sidste 10 år (2005-2015)</p> <p>Publikationstyper: guidelines</p>

Note:

- Guidelines fra firmaet Hayes er fravalgt for denne NKR
- Søgetermer og inklusions- og eksklusionskriterier er tilpasset de enkelte databaser.
- Dubletter er så vidt muligt frasorteret ved hjælp af RefWorks. De fundne referencer overføres til fagkonsulenten i Covidence. For nogle af informationskilderne var det ikke muligt at eksportere referencerne til RefWorks; disse er gennemgået af fagkonsulenten i søgeprotokollen og relevante er lagt manuelt ind. De pågældende kilder er markeret med IE (Ikke Eksporteret).
- Fuldtekster præsenteres i Covidence i pdf-format eller som link
- Søgestrategi for hver enkelt database præsenteres – hvis muligt vises det eksplicit hvor mange referencer den enkelte søgestreng genererer
- Enkelte referencer er fundet af fagkonsulenten på anden vis end gennem de systematiske søgninger. Disse er noteret nederst i dokumentet

Timeline

Key events during the development of the guidance

Date	Update
13 May 2015	The Developer may make a focused call for evidence on specific clinical questions or sub-questions after completing its initial searches. It is able to make a call for evidence at any point during development of the guideline and stakeholders are usually given 4weeks to respond. The Developer will ask all registered stakeholders for this evidence.
12 May 2015	The Developer may not issue any calls for evidence for a guideline if the Committee feels it is not necessary. The Economic plan, review questions and search strategies will be available on the website 5 weeks before the draft guideline consultation starts. The final scope defines what the guideline covers. Comments from stakeholders on the draft scope can be seen in the draft scope consultation comments table .
03 March 2015	The committee looks at the evidence and develops the recommendations in the guideline. Consultation on the draft scope is complete and the scope is being modified in the light of the comments received. The final scope will be posted here on the website. It will define what aspects of care/service delivery the guideline will cover and to whom it will apply.
02 February	The National Collaborating Centre and the Institute are in the process of agreeing details of the workplan including how the development will progress, the membership of the Guideline Development Group and timescales. The draft scope consultation and Guideline Development Group recruitment are taking

Date	Update
2015	place between 2 February – 2 March 2015. The scope defines what aspects of care/service delivery the guideline will cover and to whom it will apply. Please follow the link for further information on the draft scope consultation .
	The National Collaborating Centre is currently looking to recruit members for the Guideline Development Group. Please see here for further information.
03 December 2014	The first draft of the scope is currently in preparation. The scope will define what aspects of care/service delivery the guideline will cover and to whom it will apply.
03 October 2014	Recruitment for the Guideline Development Group Chair closes on 3rd October 2014.
19 September 2014	The National Collaborating Centre is currently looking to recruit a Chair for the Guideline Development Group. Please see here for more information.
04 August 2014	The National Institute for Health and Care Excellence (NICE) has commissioned the national Collaborating centre for Mental Health to update the clinical guideline on Eating Disorders which was published by NICE in January 2004. For further information on developing partial update guidelines please see the guidelines development manual 2012 .

Dialektisk beteendeterapi (DBT) vid borderline personlighetsstörning

Denna rapport publicerades 2005. Nya studier kan ha tillkommit. [Läs mer](#) »

Sammanfattning och slutsatser

Metod och målgrupp

Borderline personlighetsstörning kännetecknas av ett genomgående mönster av instabilitet i regleringen av känslor, bristande impulskontroll, relationsproblem och låg självkänsla. I kliniska sammanhang yttrar sig störningen i svårigheter att hantera känslor, impulsiva handlingar och aggressivitet, upprepade tillfällen med självskadande beteenden och självmordsförsök. Patienter med borderline personlighetsstörning har ofta även andra personlighetsstörningar eller sjukdomar, t ex depression, ätstörning, drogmissbruk och ångestsjukdomar. DBT är en omfattande och avancerad form av kognitiv beteendeterapi (KBT) som specifikt utvecklats för kroniskt självmordsbenägna patienter med borderline personlighetsstörning. Metoden har flera inslag, bl a beteendeförändrande tekniker och metoder för att lära sig acceptera känslor. Behandlingen genomförs i flera steg, där självskadande och terapistörande beteenden prioriteras när behandlingen inleds. Ett utmärkande drag för DBT är den omfattande kontakt som behandlingsteamet har med patienten i form av individualterapi, gruppterapi och telefonstöd. Utöver detta ingår handledning och stöd till personal som arbetar med patientgruppen. Det har beräknats att i Sverige har mellan 70 000 och 140 000 personer diagnosen borderline personlighetsstörning. Hur många av dessa som skulle kunna bli aktuella för behandling med DBT är inte klarlagt.

Rapport fra Kunnskapssenteret - Systematisk oversikt

Ingen effektstudier om behandling av gravide med spiseforstyrrelse

Publisert 29.06.2015

Reinar LM, Straumann GH, Myrhaug HT, Vist GE. Rapport fra Kunnskapssenteret nr. 14 – 2015. ISBN 978-82-8121-956-4 ISSN 1890-1298 .

Spiseforstyrrelser er alvorlige tilstander som har innvirkninger også på svangerskapet, fødselen, og mors og barns helse i tiden etterpå. Forekomsten av spiseforstyrrelser blant norske kvinner i aldersgruppen 15-44 er: 0,3 prosent med anoreksi, 2 prosent med bulimi og 3 prosent med overspisingslidelse. I denne systematiske oversikten oppsummerer vi forskning om effekter av behandling og oppfølging av gravide kvinner med spiseforstyrrelse (anoreksi, bulimi, overspisingslidelse eller uspesifisert spiseforstyrrelse).

Vi søkte systematisk etter effektstudier. Vi fant ingen studier som har vurdert effekter av behandlingstiltak for gravide med spiseforstyrrelse.

Vi fant noen få studier av behandling for kvinner med bulimi, som hadde født. Disse studiene omhandlet ikke gravide og ble ikke inkludert i våre resultater. Ingen av disse studiene var gode nok til å kunne si noe sikkert om effekter av behandlingen som ble tilbudt (kognitiv terapi, internettbasert gruppeterapi, video-feedback).

Det å kartlegge gravide med spiseforstyrrelse uten å tilby behandling er etisk problematisk. Det er behov for forskning som genererer kunnskap om effekter av tiltak for gravide med spiseforstyrrelser. Det finnes ulike behandlinger som viser effekt for en del personer med spiseforstyrrelser, som kognitiv terapi og familierapi. Vi vet ikke hvilke behandlinger som har best effekt for både mor og barn ved graviditet og spiseforstyrrelse.

Rapport fra Kunnskapssenteret - Systematisk oversikt

Behandling av personer som både har spiseforstyrrelse og diabetes

Publisert 12.08.2015 Endret 19.08.2015

Vist GE, Reinart LM, Straumann GH, Wisting L. Rapport fra Kunnskapssenteret nr. 18 – 2015. ISBN 978-82-8121-970-0 ISSN 1890-1298.

Denne systematiske oversikten omhandler effekt av strukturert behandling med vekt på blodsukkerkontroll og regelmessige måltider og psykologisk behandling, enten hver for seg eller i kombinasjon, for personer som både har en spiseforstyrrelse og diabetes.

Vårt hovedbudskap er at det er for lite tilgjengelig informasjon til at vi kan konkludere sikkert om effekten av noen av tiltakene, eller om det er forskjellig effekt på personer med forskjellige kombinasjoner av spiseforstyrrelse og diabetes. Behandling med psykoedukasjon er studert i fire små studier som omhandler 152 personer. Resultatene viser at:

Personer som både har overspisingsepisoder og diabetes type 2 kan ha samme effekt av å få ukentlig kognitiv atferdsterapi i gruppe som annen type psykologisk gruppebehandling. Denne dokumentasjonen er av lav kvalitet og vi har begrenset tillit til disse resultatene.

Personer med subklinisk spiseforstyrrelse og diabetes type 1 og personer med bulimi og diabetes type 1 kan ha effekt av psykoedukasjon, ukentlig i gruppe eller over en tre måneders periode. Denne dokumentasjonen er av svært lav kvalitet og resultatene er svært usikre.

Det mangler effektstudier som omhandler svangerskapsdiabetes. Det mangler effektstudier som omhandler personer med anoreksi og diabetes, og andre kombinasjoner av spiseforstyrrelse og diabetes.

Summary: Anorexia and bulimia nervosa are serious disorders affecting pre-adolescents,

adolescents and adults with high levels of co-morbidity, disability and mortality. The medical manifestations of these disorders are intrinsic to the illness and its treatment; some are secondary to malnutrition whereas others are the result of purging or other weight-controlling behaviours and a further group is due to poor management of nutritional problems. Eating Disorders in Children and Adolescents: A Clinical Handbook

Emne: [Eating disorders in adolescence](#) ; [Eating disorders in children](#) ; [Psychology](#) ; [PSYCHOLOGY / Psychopathology / Eating Disorders](#) ; [Psychotherapy](#)

Summary: Bringing together leading authorities, this comprehensive volume integrates the best current knowledge and treatment approaches for eating disorders in children and adolescents. The book reveals how anorexia nervosa, bulimia nervosa, and other disorders present differently developmentally and explains their potentially far-reaching impact on psychological, physical, and neurobiological development. It provides guidelines for developmentally sound assessment and diagnosis, with attention to assessment challenges unique to this population. Detailed descriptions of evidence-based therapies are
