COMMISSION IMPLEMENTING REGULATION (EU) .../...

of XXX

concerning the authorisation of a preparation of dolomite-magnesite as a feed additive for all animal species with the exception of dairy cows and other ruminants for dairy production, weaned piglets and pigs for fattening

(Text with EEA relevance)

THE EUROPEAN COMMISSION,

Having regard to the Treaty on the Functioning of the European Union,

Having regard to Regulation (EC) No 1831/2003 of the European Parliament and of the Council of 22 September 2003 on additives for use in animal nutrition¹, and in particular Article 9(2) thereof,

Whereas:

- (1) Regulation (EC) No 1831/2003 provides for the authorisation of additives for use in animal nutrition and for the grounds and procedures for granting such authorisation.
- (2) In accordance with Article 7 of Regulation (EC) No 1831/2003 an application was submitted for the authorisation of a preparation of dolomite-magnesite. That application was accompanied by the particulars and documents required under Article 7(3) of Regulation (EC) No 1831/2003.
- (3) That application concerns the authorisation of a preparation of dolomite-magnesite as a feed additive for all animal species to be classified in the additive category "technological additives".
- (4) The preparation of dolomite-magnesite belonging to the additive category of 'technological additives', was previously authorised for ten years as a feed additive for dairy cows and other ruminants for dairy production, weaned piglets and pigs for fattening by Commission Implementing Regulation (EU) No 2016/1964².
- (5) The European Food Safety Authority ('the Authority') concluded in its opinions of 17 April 2018³ and 25 January 2017⁴ that, under the proposed conditions of use, the preparation of dolomite-magnesite does not have an adverse effect on animal health, human health or the environment. The Authority has also concluded that it is effective as an anti-caking agent. The Authority does not consider that there is a need for specific requirements of post-market monitoring. It also verified the report on the method of analysis of the feed additive in feed submitted by the Reference Laboratory set up by Regulation (EC) No 1831/2003.

⁴ EFSA Journal 2017;15(2):4711.

- (6) The assessment of the preparation of dolomite-magnesite shows that the conditions for authorisation, as provided for in Article 5 of Regulation (EC) No 1831/2003, are satisfied. Accordingly, the use of that preparation should be authorised as specified in the Annex to this Regulation.
- (7) The measures provided for in this Regulation are in accordance with the opinion of the Standing Committee on Plants, Animals, Food and Feed,

HAS ADOPTED THIS REGULATION:

Article 1

The preparation specified in the Annex, belonging to the additive category 'technological additives' and to the functional group 'anticaking agents', is authorised as an additive in animal nutrition, subject to the conditions laid down in the Annex.

Article 2

This Regulation shall enter into force on the twentieth day following that of its publication in the *Official Journal of the European Union*.

This Regulation shall be binding in its entirety and directly applicable in all Member States. Done at Brussels,

For the Commission The President Jean-Claude JUNCKER
