1. Introduktion (Introduction)

Note: This Danish introduction clause will follow in an English translation

(in Danish)

Denne certifikatpolitik (CP) er udarbejdet og administreres af Digitaliseringsstyrelsen, og har været i bred offentlig høring. Den seneste version af denne CP samt eventuelle tidligere versioner, under hvilke der stadig findes gyldige certifikater, kan findes på <https://certifikat.gov.dk> eller rekvireres hos Digitaliseringsstyrelsen.

Avancerede elektroniske signaturer og segl anvendes til at sikre ægthed og integritet af data i elektronisk form. I praksis kræver brugen af sådanne signaturer og segl etablering af en Public Key Infrastructure (PKI). Digitaliseringsstyrelsen har udarbejdet denne samlede certifikatpolitik for kvalificerede certifikater og OCES-certifikater (ikke-kvalificerede), der udstedes til private personer (betegnet fysiske personer), medarbejdere (betegnet fysiske personer tilknyttet juridiske personer), og organisationer (betegnet juridiske enheder).

OCES (dansk forkortelse for *Offentlige Certifikater til Elektroniske Services*) har siden 2003 udgjort en offentlig dansk standard for ikke-kvalificerede certifikater. Udstedelse af OCES-certifikater er reguleret som en ikke-kvalificeret tillidstjeneste jf. "Europa-Parlamentets og Rådets forordning (EU) 2024/1183 af 11. april 2024 om ændring af forordning (EU) nr. 910/2014 for så vidt angår fastlæggelse af den europæiske ramme for digital identitet" (herefter benævnt eIDAS2 forordningen eller eIDAS2). Dette betyder, at eIDAS2 kræver mindst et passivt tilsyn med tillidstjenesteudbydere, der udsteder OCES-certifikater. OCES-rammeverket stiller dog krav om et aktivt tilsyn, som er sammenligneligt med det, der gælder for udbydere af kvalificerede certifikater. I denne politik er kravene til OCES-certifikater i overensstemmelse med kravene til NCP-certifikater i henhold til ETSI-standarderne.

Tillidstjenesteudbydere, der udsteder OCES-certifikater, skal anvende og opfylde kravene i denne CP eller en anden gyldig OCES-CP udarbejdet og administreret af Digitaliseringsstyrelsen. Et certifikat er således kun et OCES-certifikat, hvis det er udstedt efter en CP for OCES-certifikater og er udstedt af et CA, som er godkendt af Digitaliseringsstyrelsen som udsteder af OCES-certifikater. Som led i godkendelsen indgås en formel aftale mellem CA og Digitaliseringsstyrelsen, hvori CA bl.a. forpligter sig til at opfylde kravene i denne CP, herunder krav om revision af CA's opgavevaretagelse, jf. i øvrigt afsnit 8.

Kvalificerede certifikater er defineret og reguleret i eIDAS2 forordningen, som fastlægger rammerne for et aktivt tilsyn med tillidstjenesteudbydere, der udsteder kvalificerede certifikater.

Denne politik er en offentlig standard, der regulerer udstedelse og anvendelse af public key certifikater. eIDAS2 forordningens artikel 25 og artikel 35 omhandler retsvirkningen af elektroniske signaturer henholdsvis elektroniske segl.

Tillidstjenesteudbydere, der udsteder kvalificerede certifikater, kan anvende denne kvalificerede certifikatpolitik, som er udarbejdet og administreret af Digitaliseringsstyrelsen, eller alternativt anvende egne kvalificerede certifikatpolitikker, såfremt de overholder kravene i eIDAS2-forordningen og de tilhørende gennemførelsesretsakter.

Kravene i denne CP er i overensstemmelse med og henviser til følgende standarder:

- ETSI EN 319 401 V3.1.1 (herefter betegnet ETSI EN 319 401)
- ETSI EN 319 411-1 V1.5.1 (herefter betegnet ETSI EN 319 411-1)
- ETSI EN 319 411-2 V2.6.1 (herefter betegnet ETSI EN 319 411-2)
- ETSI EN 319 412-1 V1.6.1 (herefter betegnet ETSI EN 319 412-1)
- ETSI EN 319 412-2 V2.4.1 (herefter betegnet ETSI EN 319 412-2)
- ETSI EN 319 412-3 V1.3.1 (herefter betegnet ETSI EN 319 412-3)

Denne CP omfatter følgende kravtyper:

1. Obligatoriske krav, som skal opfyldes. Disse krav anvender termene 'shall/must'.
2. Krav, der beskriver begrænsninger i relation til denne CP, anvender termen 'must not'.
3. Krav der bør opfyldes. Hvis et sådant krav ikke opfyldes, skal der gives en begrundelse. Denne type krav anvender termen 'should'.
4. Krav der kan opfyldes efter CA's skøn. Denne type krav anvender termen 'may'.

Denne certifikatpolitik træder i kraft den 26. februar 2026. Certifikater må ikke udstedes i henhold til tidligere certifikatpolitikker udstedt af Digitaliseringsstyrelsen senere end seks måneder efter, at denne politik er trådt i kraft.

Digitaliseringsstyrelsen er den offentlige myndighed, der fører tilsyn med tillidstjenesteudbydere i Danmark.

(in English)

This Certificate Policy (CP) has been produced by and is managed by the Danish Agency for Digital Government. The latest version of this CP and any previous versions, under which valid certificates still exist, can be found on <https://certifikat.gov.dk> or can be requested from the Agency for Digital Government.

Advanced electronic signature and seal are used to ensure authenticity and integrity of data in electronic form. In practice, the use of advanced electronic signature and seal requires the establishment of a Public Key Infrastructure (PKI). The Danish Agency for Digital Government has produced this combined certificate policy for qualified and OCES (non-qualified) certificates issued to private individuals (denoted natural persons), employees (denoted natural persons associated with a legal persons) and organisations (denoted legal persons).

OCES (the Danish abbreviation for *Public Certificates for Electronic Services*) has, since 2003, constituted a public Danish standard for non-qualified certificates. The issuance of OCES certificates is regulated as a non-qualified trust service pursuant to "Regulation (EU) 2024/1183 of the European Parliament and of the Council of 11 April 2024 amending Regulation (EU) No 910/2014 as regards establishing the European Digital Identity Framework" (hereinafter denoted eIDAS2 regulation or eIDAS2). This means that eIDAS2 requires at least passive supervision of trust service providers issuing OCES certificates. However, the OCES framework imposes requirements for active supervision comparable to those applicable to providers of qualified certificates. Under this policy,

the requirements for OCES certificates are aligned with the requirements for NCP certificates in accordance with ETSI standards.

Trust service providers issuing OCES certificates shall apply and comply with the requirements set out in this CP or another valid OCES CP prepared and administered by the Danish Agency for Digital Government. A certificate is therefore only an OCES certificate if it is issued in accordance with a CP for OCES certificates and is issued by a CA that has been approved by the Danish Agency for Digital Government as an issuer of OCES certificates. As part of the approval, a formal agreement is entered into between the CA and the Danish Agency for Digital Government, under which the CA, inter alia, undertakes to comply with the requirements of this CP, including requirements for audits of the CA's performance of its duties, cf. section 8.

Qualified certificates are defined and regulated via the eIDAS2 regulation, which set the framework for an active supervisory of trust service providers issuing qualified certificates.

This policy constitutes a common public standard regulating the issuance and use of public key certificates. The legal effect of electronic signatures and electronic seals based on qualified certificates and OCES certificates issued under this policy is defined in eIDAS2 article 25 and article 35.

Trust service providers issuing qualified certificates may use this qualified certificate policy produced and managed by the Danish Agency for Digital Government but may also use proprietary qualified certificate policies if they comply with the requirements of the eIDAS Regulation, including related implementing regulation.

The requirements of this CP are compliant with and refers to the requirements in standards

- ETSI EN 319 401 V3.1.1 (hereafter denoted ETSI EN 319 401),
- ETSI EN 319 411-1 V1.5.1 (hereafter denoted ETSI EN 319 411-1),
- ETSI EN 319 411-2 V2.6.1 (hereafter denoted ETSI EN 319 411-2),
- ETSI EN 319 412-1 V1.6.1 (hereafter denoted ETSI EN 319 412-1),
- ETSI EN 319 412-2 V2.4.1 (hereafter denoted ETSI EN 319 412-2), and
- ETSI EN 319 412-3 V1.3.1 (hereafter denoted ETSI EN 319 412-3).

The requirements in this CP include:

1. Mandatory requirements, which must be met. Such requirements use the term 'shall/must'.
2. Requirements describing prohibitions in relation to compliance with this CP use the wording 'must not'.
3. Requirements that should be met. If such requirements are not met, reasons must be given. Such requirements use the term 'should'.
4. Requirements that may be met if requested by the CA. Such requirements use the term 'may'.

This certificate policy will be effective from 26th February 2026. Certificates shall not be issued from previous certificate policies issued by the Agency for Digital Government six month after this policy being effective.

The Danish Agency for Digital Government is the public supervisory body with regards to trust service providers in Denmark.

1.1 Overview

This CP describes the requirements for the issuance of an OCES or a qualified certificate to natural persons, natural persons associated with a legal person and legal persons. Requirements which are only applied to some certificate types are marked as follows

- “[POCES]” OCES certificates issued to natural persons
- “[MOCES]” OCES certificates issued to natural persons associated with a legal person
- “[VOCES]” OCES certificates issued to legal persons
- “[OCES]” All OCES certificate types
- “[QP]” Qualified certificates issued to natural persons
- “[QE]” Qualified certificates issued to natural persons associated with a legal person
- “[QO]” Qualified certificates issued to legal persons
- “[Q]” All qualified certificate types

The structure of this CP is compliant with RFC 3647 "Internet X.509 Public Key Infrastructure Certificate Policy and Certification Practices Framework".

The provisions of the Certificate Policy on how the CA must act shall ensure a high level of assurance that the subject has the identity specified in the certificate.

This means that the trust of the subscriber and relying parties can be based on the Certificate Policy and the related EU regulation, including the ongoing supervision with the CA performed by the Danish Agency for Digital Government, trust service supervisory body.

Certification authorities subject to Danish supervision issuing OCES or qualified certificates are available on request to the Danish supervisory body.

1.2 Document Name and Identification

1.2.1 Naming

This document named "Combined Public Certificate Policy for OCES and Qualified Certificates Version 8.0".

1.2.2 Identification

This CP is identified by the following object identifier (OID):

iso(1) iso-member-body(2) denmark(208) stat(169) pki(1) cp(1) general(3) major-ver(8) minor-ver(0)

Certificates issued under this CP is identified by the following object identifiers (OIDs):

- [POCES] iso(1) iso-member-body(2) denmark(208) stat(169) pki(1) cp(1) nq(1) person(1) major-ver(8) minor-ver(0)

- [MOCES] iso(1) iso-member-body(2) denmark(208) stat(169) pki(1) cp(1) nq(1) medarbejder(2) major-ver(8) minor-ver(0)
- [VOCES] iso(1) iso-member-body(2) denmark(208) stat(169) pki(1) cp(1) nq(1) virksomhed(3) major-ver(8) minor-ver(0)
- [QP] iso(1) iso-member-body(2) denmark(208) stat(169) pki(1) cp(1) q(2) person(1) major-ver(8) minor-ver(0)
- [QE] iso(1) iso-member-body(2) denmark(208) stat(169) pki(1) cp(1) q(2) medarbejder(2) major-ver(8) minor-ver(0)
- [QO] iso(1) iso-member-body(2) denmark(208) stat(169) pki(1) cp(1) q(2) virksomhed(3) major-ver(8) minor-ver(0)

The OIDs is registered in Danish Standards in accordance with DS 2391:1995, parts 1 and 3.

[QP][QE][QO] Certificates with the latter three OIDs included are qualified certificates and they require the use of QSCD to protect the subjects' private key cf. eIDAS2.

1.3 PKI Participants

1.3.1 Certification Authorities

A certification authority (CA) is a natural person or legal entity trusted by both subscribers and relying parties to generate, issue and administer electronic certificates. The CA has the overall responsibility for providing the services required to issue and maintain certificates. The CA's own keys are used to sign issued certificates, and the CA is identified in the certificate as issuer.

[REQ 1.3.1-01] Requirement REQ-7.1.1-01 in [ETSI EN 319 401] shall apply.

[REQ 1.3.1-02] Requirement REQ-7.1.1-02 in [ETSI EN 319 401] shall apply.

[REQ 1.3.1-03] Requirement REQ-7.1.1-03 in [ETSI EN 319 401] shall apply.

[REQ 1.3.1-04] Requirement OVR-5.4.1-01 in [ETSI EN 319 411-1] shall apply.

[REQ 1.3.1-05] Requirement OVR-5.4.1-02 in [ETSI EN 319 411-1] shall apply.

[REQ 1.3.1-06] Requirement OVR-5.4.1-03 in [ETSI EN 319 411-1] shall apply.

1.3.2 Registration Authorities

The registration authorities (RA) undertake the identification and registration of subjects on behalf of the CA before issuance and re-key of a certificate.

The RA may either be closely linked to the CA, or it may be an independent function, e.g. an identity proofing service provider. In any circumstances, the CA is liable for the RA's compliance with the applicable requirements and obligations in the exact same way as for its own affairs. It is the responsibility of the CA to ensure that the RA follows the provisions set out in this CP.

1.3.3 Subscribers

Prior to the issuance of certificates, the CA enters into an agreement with the subscriber.

Certificates are issued to subject. Subscribers and subjects may be the same natural person e.g. if the subscriber represents herself or himself as a private citizen or it may be different entities e.g. if the subject is a natural person associated with the subscriber.

This CP uses the terms subscriber and subject to distinguish between the entity entering into an agreement with a CA and the entity identified in the certificate.

The subscriber has the final responsibility for the use of the certificate and the related private keys, even though the subject has control of the private key.

1.3.4 Relying Parties

A relying party is the party relying on a certificate issued by the CA. This is typically a natural person or legal entity receiving an electronically signed document or authenticating a subject through the use of a PKI.

1.3.5 Other Participants

The supervisory body for CA issuing certificates according to this CP is the Danish Agency for Digital Government.

[REQ 1.3.5-01] Requirement OVR-5.4.3-01 in [ETSI EN 319 411-1] shall apply.

1.4 Certificate Usage

1.4.1 Appropriate Certificate Uses

[REQ 1.4.1-01] A certificate may be used to secure sender and message authenticity, including electronic signature and message integrity. It may also be used to ensure confidentiality (encryption).

Note: Please note the limitations in clause 1.4.2.

[REQ 1.4.1-02] Certificates issued under this CP may be valid for a period of maximum 4 years.

1.4.2 Prohibited Certificate Uses

[REQ 1.4.2-01] [OCES] OCES certificates are not qualified certificates, i.e. they must not be used in situations where qualified certificates are required.

[REQ 1.4.2-02] Certificates issued under this CP must not be used to sign other certificates.

[REQ 1.4.2-03] [POCES] [MOCES] [QP] [QE] The subject's private key must not be used without being authorized in each individual case by the subject through the use of activation data. This means that storing keys in automated systems which use them on behalf of the subject is not allowed.

[REQ 1.4.2-04] The subject's private key may not be used beyond what is specified in the certificate keyUsage, cf. clause 7.1.2.

1.5 Policy Administration

1.5.1 Organization Administering the Document

This CP is owned and maintained by Danish Agency for Digital Government.

1.5.2 Contact Person

Inquiries regarding this CP can be addressed to:

1.5.3 Person Determining CPS Suitability for the Policy

[REQ 1.5.3-01] [OCES] The CA may issue OCES certificates under this CP if the CA

- has entered into a written agreement with the Danish Agency for Digital Government to this effect; and
- has submitted a CA report, cf. below, to the Danish Agency for Digital Government; and
- has received a declaration of compliance from the Danish Agency for Digital Government confirming that the Danish Agency for Digital Government has approved the submitted report and considers the requirements of this CP to be met.

Note: If CA is the Agency for Digital Government on behalf of the Danish state no written agreement shall be entered cf. first bullet in the above.

[REQ 1.5.3-02] [OCES] An updated CA report must be submitted at least once a year to the Danish Agency for Digital Government.

[REQ 1.5.3-03] [OCES] The report must include:

- CAs, CPS;
- Auditor's records from conformity assessment body;
- a declaration from the CA's management specifying whether the CA's overall data, system and operational security can be considered adequate and that the CPS addresses all requirements of this CP and that the CA complies with its own CPS;
- a declaration from the conformity assessment body specifying whether the CA's overall data, system and operational security – in the opinion of the body – can be considered adequate and that the CPS addresses all requirements of this CP and that the CA complies with its own CPS; and
- documentation of liability insurance covering CA's liability.

[REQ 1.5.3-04] [OCES] The report and its content must be in Danish or English. The Danish Agency for Digital Government may grant an exemption for this requirement.

1.5.4 CPS Approval Procedures

[REQ 1.5.4-01] All requirements in [ETSI EN 319 401] clause 6.1 "Trust Service Practice statement" shall apply.

[REQ 1.5.4-02] Requirement OVR-5.2-02 in [ETSI EN 319 411-1] shall apply.

[REQ 1.5.4-03] Requirement OVR-5.2-10 in [ETSI EN 319 411-1] shall apply.

[REQ 1.5.4-04] The CPS must be in Danish or English.

1.6 Definitions and Acronyms

1.6.1 Definitions

This clause provides definitions of the special terms used in this CP.

Activation data: Data that can activate the use of the subject's private key(s). This may be a password.

Authorized person/entity: Person or logical entity given authority by a management representative with the required power of procuration from the sub-scriber to register any subjects and administer certificates for subscriber on behalf of the business.

Certification authority – CA: A natural person or legal entity generating, issuing and administering certificates in its capacity as trust service provider. The eIDAS Regulation uses the term certification-service-provider for this entity.

Certification Practice Statement – CPS: A specification of the principles and procedures used by the CA when issuing certificates to comply with related CPs. See the description in RFC 3647 clause 3.4.

Public key certificate: An electronic certificate specifying the subscriber's public key as well as additional information which uniquely links the public key to the identification of the subscriber. A public key certificate must be signed by a Certification Authority (CA) which thus confirms the validity of the certificate.

Subject: A natural person or entity with a subscriber who/which, in the certificate, is identified as the proper user of the private key that belongs to the public key, which is granted in the certificate, and to whom an OCES certificate is either being issued or has already been issued.

Subscriber: A natural person or legal entity who/which concludes an agreement with the issuing Certification Authority (CA) on the issuance of certificates to one or more subjects.

Certificate Policy: A set of rules that sets out requirements for the issuance and use of certificates or several specific contexts with common security requirements. See the description in RFC 3647 clause 3.1.

Danish Data Protection Act: Act no. 502 of 23 May 2018 on additional provision on the protection of natural persons with regard to the processing of personal data and on the free movement of such data.

Digital signature: Data in electronic form used for authentication of other electronic data to which the digital signature is attached or logically connected.

Sole control: Property which uses up-to-date technical and administrative measures to ensure that a given entity solely controls the use of a resource.

Examples:

A subject (entity) may have sole control of a private signature key (resource) by placing the private key securely on a cryptographic hardware module where the activation of the key is based on something held and known only by the subject.

ISO 27001: "ISO/IEC 27001:2022 - Information technology – Security techniques – Information security management systems" as well as subsequent amendments.

ISO 27002: "ISO/IEC 27002:2013 - Information technology – Security techniques – Code of practice for information security controls" as well as subsequent amendments.

Cryptographic module: Hardware unit which independently of the operating system can generate and store keys and use the digital signature with appropriate certification e.g. SSCD-PP Type 3.

Qualified certificate: "Qualified Certificate for Electronic Signature" or a "Qualified Certificate for Electronic Seal" as defined in eIDAS Article 3(15) and Article 3(30), respectively.

Employee: Person associated with the organization specified in the certificate.

Relying party: a natural person or legal entity relying on a CA as a trusted service.

Key Escrow: Storing of keys with a view to making them available to a third party in order for such third party to decrypt data.

Conformity assessment body: Legal entity that audits the CA's compliance with this certificate policy. See clause 8 for requirements for the conformity assessment body.

Private key: The subject's key for provision of digital signature or for decryption. The private key is personal and must not be disclosed by the subject.

Registration authority –RA: The natural person or legal entity responsible for identifying and authenticating a (coming) subject.

Root CA: Highest CA in a hierarchy of CAs.

Root certificate: A public certificate issued by a CA for validating other certificates. A root certificate is signed with its own signing key ("self-signed").

Root key: The root CA's private and public keys used for signing certificates and certificate revocation lists.

Level of Assurance (LoA): The degree of trust in an authenticated electronic identity.

Certificate Revocation List: List of certificates that are no longer considered valid because they have been permanently revoked.

3. Identification and Authentication

3.1 Naming

3.1.1 Type of Names

[REQ 3.1.1-01] [MOCES] [VOCES] [QE] [QO] The subscriber shall be identified by a name registered in the CVR. However, deviations are allowed, cf. clause 3.1.2.

[REQ 3.1.1-02] The subject shall be identified by a registered name or a pseudonym. However, deviations are allowed, cf. clause 3.1.2. It must be recorded whether a name or pseudonym has been used.

Note: Regardless of whether the CA enters the name of pseudonym of the subject, the CA must, possibly via a third party, be able to identify the subject as a natural person.

3.1.2 Need for Names to be Meaningful

[REQ 3.1.2-01] [MOCES] [VOCES] [QE] [QO] The name of the subscriber shall be the name or secondary name registered in the CVR. However, corporate forms in the name, e.g. 'ApS', 'A/S' and 'Fonden' may be left out. Danish letters and special characters may be re-placed unless this causes obvious misunderstandings, and long names may be abbreviated unless this causes obvious misunderstandings.

[REQ 3.1.2-02] [POCES] [QP] The name of the subject shall be verified via an authoritative source.

Note: An authoritative source may be the Civil Registration system, eIDAS nodes (cf. Article 12 of eIDAS) or a valid passport.

[REQ 3.1.2-03] [POCES] [MOCES] [QP] [QE] If the subject is registered with a name, such name shall as a minimum consist of a registered first name and last name. Any middle name may be omitted, and the name must not include words not forming part of a subject's name such as pet names.

[REQ 3.1.2-04] If the subject is registered with a pseudonym, such pseudonym may not be of a nature that may cause obvious misunderstandings and must not be identical or confusingly like a trademark. Moreover, the CA may reject the use of pseudonyms.

Note: The CA may reject a pseudonym if it may be perceived as offensive or un-ethical.

3.1.3 Anonymity or Pseudonymity of Subscribers

[REQ 3.1.3-01] The subscriber shall be able to select that the name of the subject does not appear from issued certificates.

3.1.4 Rules for Interpreting Various Name Forms

N/A

3.1.5 Uniqueness of Names

8. Compliance Audit and Other Assessments

[REQ 8-01] Requirement REQ-7.13-01 in [ETSI EN 319 401] shall apply.

[REQ 8-02] Requirement REQ-7.13-02 in [ETSI EN 319 401] shall apply.

[REQ 8-03] [OCES] The CA except for the Danish State acting as CA shall enter into an OCES agreement with the Agency of Digital Government before issuing OCES certificates.

8.1 Frequency and Circumstances of Assessment

[REQ 8.1-01] Regular, documented internal system audits of the CA's overall system shall be undertaken.

[REQ 8.1-02] [OCES] An external conformity assessment shall be undertaken of the CA's overall system by a conformity assessment body, cf. REQ 8.2-01, at least once a year.

8.2 Identity/Qualifications of Assessor

[REQ 8.2-01] [OCES] The CA shall select an external conformity assessment body for undertaking the assessment at the CA. The conformity assessment body must either be a conformity assessment body defined in eIDAS article 3 letter 18) or a state-authorized auditor that can document to the Danish Agency for Digital Government that it possesses the requisite resources to perform an adequate system audit of the CA. The Danish Agency for Digital Government may in special circumstances grant an exemption from the requirement that the conformity assessment body must be a state-authorized auditor. The CA must at the latest one month after selection of the conformity assessment body report this to the Danish Agency for Digital Government.

[REQ 8.2-02] [OCES] The CA must make the selected conformity assessment body aware that in accordance with good auditing practices must perform system audits, including making sure that:

- The CA's systems are in compliance with the requirements in this CP.
- The CA's security, checking and auditing needs are addressed to a sufficient scope by development, maintenance and operation of the CA's systems.
- The CA's business procedures, both IT-based as well as manual procedures, are reliable as regards security and checking considerations and in accordance with the CA's CPS.

System audits may use the audit instructions for public certificate policies published by the Danish Agency for Digital Government if available.

[REQ 8.2-03] [OCES] The CA must make the selected conformity assessment body aware that it is obligated to report a condition or the conditions to the Danish Agency for Digital Government if the conformity assessment body continues to be of the opinion, that significant weaknesses or irregularities are occurring. The CA must in addition make the conformity assessment body aware that upon inquiry by the Danish Agency for Digital Government it is obligated to give information on the CA's circumstances that have or may have an influence on the CA's administration of its task as the issuer of OCES certificates, without prior acceptance by the CA. The conformity assessment body is however obligated to orient the CA on the inquiry.

[REQ 8.2-04] [OCES] The Danish Agency for Digital Government may order the CA to within an established deadline select a new conformity assessment body if the functioning conformity assessment body is found to be obviously unsuited for its duties.

[REQ 8.2-05] [OCES] Upon changing the conformity assessment body, the CA and the withdrawing conformity assessment bodies must each give an explanation to the Danish Agency for Digital Government.

8.3 Assessor's Relationship to Assessed Entity

[REQ 8.3-01] [OCES] The selected conformity assessment body shall co-operate with the internal assessment function at the CA.

8.4 Topics Covered by Assessment

[REQ 8.4-01] [OCES] The CA must deliver the information that is necessary for the system audit at the CA. In this regard the CA must give the conformity assessment body access to the management records.

[REQ 8.4-02] [OCES] The CA must give the selected conformity assessment body access to management meetings during the processing of matters that are of significance to the system audit. What is to be understood by a management meeting is a meeting of the senior management of the CA, in practice often called a board meeting. What is to be understood in this context by the expression 'the CA's management' is the senior management of the CA, i.e. the board or an equivalent management body depending upon how the CA has been organized. The CA must ensure that the selected conformity assessment body participates in the processing of applicable matters, if it is desired by just one management member.

[REQ 8.4-03] [OCES] At CAs where an annual general assembly is held, the provisions of the Danish Company Accounts Act concerning the auditor's obligation to answer questions at a company's annual general meeting applies equivalently for the selected conformity assessment body.

[REQ 8.4-04] [OCES] The CA must be able to document its fulfilment of the applicable legal requirements. Particularly in respect of eIDAS, GDPR and the Danish Data Protection Act.

8.5 Actions Taken as a Result of Deficiency

[REQ 8.5-01] [OCES] To the extent that the selected conformity assessment body discovers significant weaknesses or irregularities, the CA's management shall consider the matter at its next meeting and within a reasonable time period.

8.6 Communications of Results

[REQ 8.6-01] [OCES] The CA and the conformity assessment body shall immediately inform the Danish Agency for Digital Government about any matters that are decisive to the CA's continued operations.

[REQ 8.6-02] [OCES] At least once a year, the selected conformity assessment body will prepare a report for the CA's management.

[REQ 8.6-03] [OCES] This report shall include declarations as to whether

- the assessment has been carried out in accordance with generally accepted auditing practice;

- the selected conformity assessment body complies with the competency requirements given under the law;
- the selected conformity assessment body has been given all the information it has requested;
- the stated assessment tasks have been undertaken in accordance with the requirements of this CP, including whether there are any matters that have given rise to significant remarks and
- the overall data, system and operational security should be considered as adequate.
