COMMISSION IMPLEMENTING REGULATION (EU) .../...

of **XXX**

**concerning the authorisation of 4-allyl-2,6-dimethoxyphenol and eugenyl acetate as feed
additives for all animal species except for fish and poultry.**

(Text with EEA relevance)

COMMISSION IMPLEMENTING REGULATION (EU) .../...

of **XXX**

concerning the authorisation of 4-allyl-2,6-dimethoxyphenol and eugenyl acetate as feed additives for all animal species except for fish and poultry.

(Text with EEA relevance)

THE EUROPEAN COMMISSION,

Having regard to the Treaty on the Functioning of the European Union,

Having regard to Regulation (EC) No 1831/2003 of the European Parliament and of the Council of 22 September 2003 on additives for use in animal nutrition¹, and in particular Article 9(2) thereof,

Whereas:

- (1) Regulation (EC) No 1831/2003 provides for the authorisation of additives for use in animal nutrition and for the grounds and procedures for granting such authorisation. Article 10 of that Regulation provides for the re-evaluation of additives authorised pursuant to Council Directive 70/524/EEC².
- (2) 4-Allyl-2,6-dimethoxyphenol and eugenyl acetate were authorised without a time limit in accordance with Directive 70/524/EEC as feeds additives for all animal species. Those products were subsequently entered in the Register of feed additives as existing products, in accordance with Article 10(1) of Regulation (EC) No 1831/2003. 4-Allyl-2,6-dimethoxyphenol and eugenyl acetate for poultry and fish will not be re-authorised as they were withdrawn by the applicant.
- (3) In accordance with Article 10(2) of Regulation (EC) No 1831/2003 in conjunction with Article 7 thereof, an application was submitted for the re-evaluation of 4-allyl-2,6-dimethoxyphenol and eugenyl acetate as feed additives for all animal species. The applicant requested those additives to be classified in the additive category "sensory additives". That application was accompanied by the particulars and documents required under Article 7(3) of Regulation (EC) No 1831/2003.
- (4) The European Food Safety Authority ('the Authority') concluded in its opinion of 15 November 2011³ that, under the proposed conditions of use in feed, 4-allyl-2,6-dimethoxyphenol and eugenyl acetate do not have adverse effects on animal health, human health or the environment. The Authority further concluded that the function of 4-allyl-2,6-dimethoxyphenol and eugenyl acetate in feed is similar to that on food. The Authority has already concluded that for food those substances are efficacious, as it increases the food smell or palatability. Therefore, that conclusion can be extrapolated for feed. The Authority is not in a position to evaluate the use 4-allyl-2,6-dimethoxyphenol and eugenyl acetate in water for drinking. However, those

³ EFSA Journal 2011;9(12):2440.

substances can be used within compound feeds which are subsequently administered via water.

- (5) Restrictions and conditions should be provided for to allow better control. Since safety reasons do not require the setting of a maximum content and taking into account the re-evaluation performed by the Authority, recommended contents should be indicated on the label of the additive. Where such contents are exceeded, certain information should be indicated on the label of premixtures, compound feeds and feed materials".
- (6) The Authority concluded that 4-allyl-2,6-dimethoxyphenol is irritant to eyes and skin and that eugenyl acetate is irritant to skin only. Consequently, appropriate protective measures should be taken. The Authority does not consider that there is a need for specific requirements of post-market monitoring. It also verified the report on the method of analysis of the feed additives in feed submitted by the Reference Laboratory set up by Regulation (EC) No 1831/2003.
- (7) The assessment of 4-allyl-2,6-dimethoxyphenol and eugenyl acetate shows that the conditions for authorisation, as provided for in Article 5 of Regulation (EC) No 1831/2003, are satisfied. Accordingly, the use of those substances should be authorised as specified in the Annex to this Regulation.
- (8) Since safety reasons do not require the immediate application of the modifications to the conditions of authorisation for 4-allyl-2,6-dimethoxyphenol and eugenyl acetate it is appropriate to allow a transitional period for interested parties to prepare themselves to meet the new requirements resulting from the authorisation.
- (9) The measures provided for in this Regulation are in accordance with the opinion of the Standing Committee on Plants, Animals, Food and Feed,

HAS ADOPTED THIS REGULATION:

Article 1 *Authorisation*

The substances specified in the Annex, belonging to the additive category 'sensory additives' and to the functional group 'flavouring compounds', are authorised as feed additives in animal nutrition subject to the conditions laid down in that Annex.

Article 2 *Transitional Measures*

1. The substances specified in the Annex and premixtures containing those substances, which are produced and labelled before *[6 months after the date of entry into force of this Regulation – Date to be inserted by the Service responsible for the publication]* in accordance with the rules applicable before *[the date of entry into force of this Regulation – Date to be inserted by the Service responsible for the publication]* may continue to be placed on the market and used until the existing stocks are exhausted.
2. Compound feed and feed materials containing the substances as specified in the Annex which are produced and labelled before *[12 months after the date of entry into force of this Regulation – Date to be inserted by the Service responsible for the publication]* in accordance with the rules applicable before *[the date of entry into force of this Regulation – Date to be inserted by the Service responsible for the publication]* may continue to be placed on the market and used until the existing stocks are exhausted if they are intended for food-producing animals.

3. Compound feed and feed materials containing the substances as specified in the Annex which are produced and labelled before *[24 months after the date of entry into force of this Regulation – Date to be inserted by the Service responsible for the publication]* in accordance with the rules applicable before *[the date of entry into force of this Regulation – Date to be inserted by the Service responsible for the publication]* may continue to be placed on the market and used until the existing stocks are exhausted if they are intended for non-food-producing animals.

Article 3
Entry into Force

This Regulation shall enter into force on the twentieth day following that of its publication in the *Official Journal of the European Union*.

This Regulation shall be binding in its entirety and directly applicable in all Member States.

Done at Brussels,

For the Commission
The President
Jean- Claude JUNCKER
