Søgeprotokol for Nationale Kliniske Anbefalinger

Projekttitel/aspekt	NKA for svære psykiske lidelser, Bipolar – sekundær og primær litteratur søgning - PICO 1
Fagkonsulent / Metodekonsulent /projektleder	Klaus Munkholm Anja Ussing, Gustav Hildebrandt Sengül Sari Canbolat
Søgespecialist	Birgitte Holm Petersen, SST
Senest opdateret	2. februar 2024

Baggrund	Baggrund for valg af spørgsmål: Bipolar lidelse er en alvorlig sindslidelse med en forekomst på 1-2% i den danske befolkning (1). Sygdommen debuterer oftest i ungdomsårene og er forbundet med stor sygelighed og øget dødelighed og mange patienter modtager livslang behandling. Der behandles med mange forskellige lægemidler for hhv. mani, depression og i vedligeholdelsesbehandling ved bipolar lidelse, og der mangler opdateret konsensus om valg vedligeholdelses-behandling. Vedligeholdelsesbehandling har som mål at forebygge udviklingen af sygdomsepisoder i form af mani, depression og blandingstilstand. Lithium har længe været førstevalg som vedligeholdelsesbehandling ved bipolar lidelse sammen med antikonvulsiva og antipsykotika. Antikonvulsiva, især i form af lamotrigin, anvendes i stigende grad, især ved bipolar lidelse type 2. Vedligeholdelsesbehandling med antidepressiva anbefales normalt ikke ved type 1 bipolar lidelse, men er i både danske vejledninger og i internationale vejledninger foreslået at overveje ved type 2 lidelse, selvom det er omdiskuteret. Alle lægemidlerne kan give alvorlige bivirkninger, og der er forholdsregler ved behandlingen med dem, herunder forskellige behov for kontrol m.m. Der er betydelige forskelle i anbefalingerne i internationale retningslinjer og der er i Danmark uens praksis og ikke faglig enighed. Det er samlet set uklart hvilket lægemiddel, der bør anvendes som førstevalg som vedligeholdelsesbehandling og om behandlingen bør være den samme for henholdsvis bipolar lidelse type 1 og type 2, og om behandlingen hos børn og unge bør være den samme som for voksne. Arbejdsgruppen ønsker at afklare de gavnlige og skadelige virkninger ved de tre lægemiddelgrupper mhp. at afdække hvilket lægemiddel der bør vælges som 1. valg i vedligeholdelsesbehandlingen ved bipolar lidelse. Bipolar PICO 1: Hvilket peroralt lægemiddel bør man anvende som vedligeholdelsesbehandling til patienter med bipolar lidelse?
